

*We want to build and launch rockets,
that's what we are here to do.*

Daily Update: We met with ULA today and unfortunately, we are still very far apart on some major issues. There's a lot of work left to do but we still have time to bring back the contract you deserve. Your surveys and feedback continue to provide the path we follow as we fight for a contract that will protect us now and in the future. ULA needs to understand that it's the men and women back home who make this company an industry leader. IAM members are the reason why ULA has a 100% mission success rate for launches. It's our members who do the work that brings in the profits for this company to remain successful. Members, our Solidarity matters right now. As your Negotiating Team stands strong, we ask those who sent us here, on shop floors across the USA, to do the same. We are the Fighting Machinists and we don't run away from a fight.

We are here until the job is done.
